SUHUL NAJID

COMPANY PROFILE 2024

About us

Suhul Najid is a leading agricultural company in Saudi Arabia, dedicated to environmental restoration and sustainability. Our primary focus is combating desertification and minimizing carbon emissions through innovative land reclamation projects, tree planting, and coastal vegetation initiatives. We strive to build a greener, healthier future by enhancing Saudi Arabia's natural landscapes, both in coastal regions and deep within the desert.

Our vision

At Suhul Najid , we believe in the power of nature to restore balance to our environment. Our vision is to create thriving ecosystems by revitalizing land, reducing carbon footprints, and expanding green spaces, thus contributing to the global fight against climate change.

Our mission

At Suhul Najid , our mission is to lead the way in combating desertification and reducing carbon emissions through sustainable agriculture and land restoration projects. We are committed to enhancing Saudi Arabia's natural environment by planting trees, reclaiming degraded lands, and leveraging innovative technologies. Through our efforts, we aim to restore ecosystems, support biodiversity, and contribute to a greener, more sustainable future for the Kingdom and the planet.

CORE SERVICES

1- Tree Planting & Reforestation

We specialize in planting a variety of tree species, including mangroves for coastal protection, and native desert species like Acacia and Ziziphus to combat desertification. These efforts not only restore ecosystems but also enhance carbon sequestration and improve air quality.

2- Land Reclamation & Vegetation Cover

Our expertise lies in reclaiming desert land and transforming it into productive, green spaces, providing essential vegetation that supports biodiversity and combats erosion.

3- Carbon Emission Reduction

We are at the forefront of carbon monitoring, conducting thorough studies to measure carbon emissions and develop strategies to minimize their impact. Our aim is to help reduce Saudi Arabia's carbon footprint and contribute to the Kingdom's sustainability goals.

4- Coastal Restoration & Mangrove Nurseries

Our nurseries grow and nurture mangroves, which play a vital role in protecting coastlines, improving water quality, and providing habitats for marine life.

5- Technological Innovation in Agriculture

Leveraging advanced technologies such as smart irrigation systems and AI-driven monitoring tools, we ensure that our operations are efficient, sustainable, and environmentally friendly.

Why Choose Suhul Najid ?

- **Sustainability at the Core:**

Our projects are designed to promote long-term environmental sustainability, aligning with both national and global green initiatives.

- **Proven Expertise:**

With a highly trained team and cutting-edge tools, we are fully equipped to handle large-scale agricultural and environmental projects.

- **Diverse Solutions:**

From tree planting to carbon monitoring and coastal restoration, we offer a comprehensive range of services to meet the growing demand for green projects in Saudi Arabia.

Our Commitment to Green Saudi Arabia

As active participants in the Green Saudi Initiative, **Suhul Najid** is proud to contribute to the national goal of planting 10 billion trees across 40 million hectares. By promoting sustainable forestry and innovative land reclamation, we are helping to shape a greener and more resilient Saudi Arabia for future generations.
